

**C.C.M.C. Acceptance No. : 12691-R**

MiTek Canada Inc.'s **trimmable POSI-STRUT** system offers the ultimate in **design flexibility!** Using the same engineering support that has become the standard in the structural component industry, our **on site trimmable detail** eliminates headaches due to bearing location discrepancies or design changes and assures that **every floor system fits perfectly.**

Its **open web design** eliminates the need for cutting and drilling; so plumbing, electrical and ventilation services are installed quickly, **saving time and money.**

MiTek's trimmable POSI-STRUT trusses **minimize the environmental footprint** by incorporating renewable as well as recycled materials to fight climate change by **reducing greenhouse gases.**
